

ATT002 Talla 2XLC feat. Skysurfer - Terra Australis

Artist: Talla 2XLC feat. Skysurfer
Title: Terra Australis
Release: Dec. 11th 2009

Info

Talla 2XLC teams up with German trance duo Skysurfer, and the outcome is a massive, melodic EDM anthem of epic proportions!

"Terra Australis" is based around Talla's impressions while touring in Australia for the first time, as he was so impressed by the vibe and energy, that he brought those feelings and ideas back to his hometown of Frankfurt. Talla then went into the studio with Andreas Kraemer and Thomas Pogadl of Skysurfer, who are also responsible for big choons of Solid Sleep, Schwarze Puppen etc, and they put their heads together to see what would come from these ideas.

Together they created a musical masterpiece, a combination of melodies & harmonies which have not been delivered for some time now. This is what dance music is about, when the music touches your soul and creates goosebumps all over your body, then you can truly feel the music. On top of that, famous trance producer Jorn van Deynhoven has also added his own unbelievable extras with his remix of "Terra Australis".

With "Terra Australis", Talla 2XLC proves once again that he is one of the leading artists in his genre, and that he delivers the big emotional songs that only he can provide.
