

# Tets110 Talla 2XLC pres.: Diskomo - Light Years Away

**Artist:** Talla 2XLC pres.:  
Diskomo

**Title:** Light Years Away

**Release:** 06.03.2009

## About:

May we offer you some Dance-Chill-Thrill ?

Pedal to the metal, a floorburner in the trunk – that's Talla's start into 2009. The first track of his new project Diskomo lifts the listener in the club mix with a quick and tremendous beat onto the dancefloor. That's where you will stay.

Noble and soothing chillout-parts harmonically join the massive sound, that does not lose any dynamic. Match it if you can. The relaxing piano-part later raises in a combination with phat and expansive synthie-parts to a mindblowing sound, that is the most intense part of the track. It freezes your blood and at the same time causes pulsation: Goose bumps and a pulse at 180. Great feeling that leads to exhaustion. Finally - and thank god - Talla elevates his foot from the pedal.

The Mark Arbor Mix uses only a part of the wonderful piano sequence. Melody is not that dominant here – in contrast to the dance beat. The break brings a surprise: Beats are off, only synthies rule. And when then the melody comes in, it sounds even more playful than the club mix. This sound would also fit in clubs that don't focus strictly on trance and electro.
