

Tets111 Talla 2XLC - Salvation

Artist: Talla 2XLC
Title: Salvation
Release Date: 29.05.2009

Info:

German techno-dinosaur Talla 2XLC launches his Ibiza-attack 2009: "Salvation" gives you the possibility to party hard – or to go out and have fun in a more relaxed and dignified way.

The pure instrumental sound of Talla's club mix is like a driving force, full of energy almost exploding. "Salvation" contains an unobtrusive melody that causes immediate goose-bumps and stands for good vibes and dancing with its intoxicating beats. In short: This music is a salvation from fatigue, inaction, spiritlessness. A salvation from being a couch-potatoe, getting asleep in front of TV...it's an invitation to wake up and dance, an invitation to have fun. How is this magic created? Just listen. We won't reveal the secret.

The promising newcomer-producerteam TNR lays a lightness and elegance over this dynamic sound that kind of tames the energy without reducing it too much. TNR route the power of "Salvation" to a new sound experience. They make you dream, relax – and dance. A soft melody, you want to hear over and over again combined with quite a fast beat form a delicate and stimulating "Eivissa"-sound.
