Artist: David Forbes meets William Daniel

Title: Devils Theory

Info:

David Forbes has over 15 years experience in high quality electronical music. Working as a DJ he already played side by side together with lots of stars of the scene and sucessfully finished his australian tour not long ago. His own productions are played and supported by all well-known DJs. His old and longtime friend and DJ partner William Daniel, who also writes for M8 magazine and who played in almost every well known "scottish-clubnight", joined him and created the groovy and impulsive track "Devils Theory". The feelings and experiences of both artists flow into it and came together. The result is a progressive Trance production full of energy, what pushes forward and takes closely everybody who normally does not dance, on the dancefloor. The original mix: popping drums and percussions came together and combined with their strong synths get every party going. The TnR Remix also goes directly to the legs and thanks to the nice harmonies the heart of every Uplifting fan is blooming to!
