

# Tets102 - Talla & Ace

**Artists:** Talla & Ace  
**Title:** Redrum o.t.d.  
**Release:** April 2008

## About:

"Renowned for their undeniable distinct and massive, floor filling Trance sound, production partners Talla 2XLC and Ace Da Brain are at it again.

After teaming up in 2006 with their own rendition of Airfire's "No Signs of Life", Talla and Ace have been an unstoppable force in today's dance music scene. Having discovered their natural ability to work closely together in the studio, and after releasing monster tracks such as "Shine" and "No In Between", they have begun work on their new side project, Talla and Ace.

The first release under this project will be "Redrum O.T.D." and has already taken shape into a sound that will rock dance floors worldwide. The original mix is already creating a stir within the scene and will be joined shortly with remixes by Carl B. and Maarten de Jong.

Fused with the sounds of Trance that only Talla and Ace can design, coupled with the likes of Carl and Maarten, "Redrum" will undeniably be a track worth capturing and deliver a beat for the mass of crowds to dance to."
